Gajanan Bidwai

LinkedIn: linkedin.com/in/gajanan19
Github : github.com/Gajanan1904
Email: gbidwai19@gmail.com
Mobile: +91-7775018550

Skills

Data Analysis: Statistical Analysis, Data cleaning, Data Validation, EDA
Technical Tools: MySQL, Excel , Tableau, Power BI , PostgreSQL , SQLite , Hadoop
Machine Learning: Regression, Classification, Model Building, Predictive Analytics
Programming: C, C++, Python, Java, JavaScript, HTML, CSS
Other Skills: Data Visualization, DSA, Git/GitHub
Soft Skills: Problem-Solving, Team Player, Leadership, Adaptability, Attention to Detail

Experience

Lovely Professional University, Phagwara (Freelance) Mar 2024 – Jan 2026

Lead - Data Management

- Managed structured datasets for a 100+ member organization, maintaining 99% data accuracy through validation and consistency checks.
- Automated data quality processes using Excel and SQL-based logic, reducing manual errors by 40%.
- Performed data analysis and reporting to support decision-making and ensure data reliability across workflows.

Projects

Attrition Risk and Workforce Analysis Segmentation Using ML | Link Nov 2025 - Present

- Machine learning–based churn prediction and employee segmentation implemented using XGBoost to identify high-risk churn and low-performance patterns.
- Data preprocessing, missing value treatment, outlier handling, feature encoding, and optimization workflows executed, improving model training efficiency by 40%.
- 92% classification accuracy achieved; SQL-driven analytical insights and interactive Power BI dashboards delivered, reducing manual HR analysis by 60% and accelerating decision-making by 30%.
- **Tech**: Python, Pandas, Scikit-learn (LR, KNN, Decision Tree), Matplotlib, Seaborn.

Data Driven Churn Prediction Analysis with ML, SQL & Power BI | Github Link Jun 2025 – Jul 2025

- Predictive churn classification and employee performance segmentation executed using gradient boosted decision trees to isolate at-risk cohorts.
- Data quality engineering applied through null value imputation, anomaly treatment, and categorical transformation, resulting in 40% faster model convergence.
- 92% model accuracy attained; SQL-based analytical queries and Power BI visual analytics produced, reducing manual evaluation effort by 60% and improving decision turnaround by 30%.
- **Tech**: Python, Pandas, Scikit-learn, XGBoost, Power BI, MySQL

EDU_HUB Personalized Learning System | Github Feb 2024 – Present

- Personalized e-learning platform architecture developed to deliver adaptive learning pathways with optimized UI responsiveness and 50% reduction in page load latency.
- Client–server integration implemented through Django- and PHP-based APIs, supporting secure authentication, dynamic content rendering, and seamless data exchange.
- UI standardization, accessibility compliance, cross-device compatibility achieved, leading to project selection and recognition at HACK-IOT 2024.
- **Tech**: HTML, CSS, JavaScript, Python Django, PHP

Certificates

- Complete Data Structure and Algorithm - **Apna College** Nov 2025
- Cloud Computing and Architecture - **NPTEL** Oct 2024
- Python for Data Science – **Coursera** Feb 2024

Achievements

Qualified GATE 2026 (Computer Science & Information Technology) Mar 2026

- Qualified GATE 2026, demonstrating strong aptitude in computer science and problem-solving.

Top 5 Finalist Tech Blitz Hackathon, Coding Ninjas LPU Jun 2024

- Achieved Top-5 rank among 750+ participants in the Tech Blitz Hackathon

Winner HACK-IOT 2024 Hackathon, Lovely Professional University Feb 2024

- Secured 1st Position among 450+ participating teams for developing an innovative EdTech..

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering; ***CGPA: 7.40*** *Aug 2023 - Present*

Swa. Sawarkar Higher Secondary School Parbhani, Maharashtra
Intermediate; ***Percentage: 88.00*** *Jun 2020 - May 2022*

Aurobindo Aksharjyoti School Parbhani, Maharashtra
Matriculation; ***Percentage: 90.20*** *Jun 2019 - May 2020*
